

# *Water Smart Landscapes Program Plant List*

The Water Smart Landscapes Program Plant List is an administrative tool specifically for operating the Southern Nevada Water Authority's (SNWA's) Water Smart Landscapes Program. It contains some of the most common plants found in Southern Nevada landscapes. This is a tool for participants in the Water Smart Landscapes Program to calculate the 50% canopy coverage requirement. The square footage value given for each plant is its mature size and will be used by the SNWA to determine the canopy coverage regardless of the size of the plant at the time of the inspection.

The SNWA does not endorse or require the use of any or all plants found on this list. Participants may use any living plant, where the trunk or stem is within the converted area, towards meeting the 50% canopy coverage requirement.

Plants marked with a \* are no longer to be sold or planted. They are either on the State of Nevada's noxious weed list or banned by the Clark County Health District for their allergenic properties.

This list is alphabetized by the Common name, a list alphabetized by Botanical name is available on the SNWA's website or by calling the Conservation Helpline at 258-SAVE (7283).
