Acknowledgements

This Regional Plant List is the product of countless hours of work from members of the Southern Nevada Regional Planning Coalition's (SNRPC) Regional Urban Forestry Work Group and local arboriculture and horticulture experts. Special thanks to the following individuals:

2011 Contributors

Shane Ammerman, Clark County
Paul Andricopoulos, City of Henderson
Cleto Arceo, NV Energy
Andrea Baker, Southern Nevada Water Authority
Dave Cornoyer, City of Las Vegas
Adria DeCorte, Nevada Division of Forestry
Greg Deuley, TruGreen Landcare
Paula Garrett, University of Nevada Las Vegas
Steve G limp, Schilling Horticulture Group, Inc.
Bob Hoyes, City of North Las Vegas
Jon Jainga, City of North Las Vegas
Michael Johnson, City of Henderson
John Jones, City of North Las Vegas
Teri Knight, United States Department of Agriculture
Matt Koepnick, Nevada Division of Forestry
Paul Noe, Star Nursery
Lisa Ortega, City of Henderson
Craig Palmer, University of Nevada Las Vegas
Alan Paulson, Clark County School District
Lynn Phelps, professional arborist
M.L. Robinson, UNR Cooperative Extension
Norm Schilling, Schilling Horticulture Group, Inc.
Daniel Sinagra, Clark County
Dennis Swartzell, Horticultural Consultants, Inc.
Russ Thompson, Clark County
Amie Wojtech, City of Henderson

2021 Update Contributors

Shane Ammerman, Clark County
Paul Andricopoulos, City of Henderson
Andrea Baker, Southern Nevada Water Authority
Doug Bennett, Southern Nevada Water Authority
Keely Brooks, Southern Nevada Water Authority
Brad Daseler, Clark County Parks & Recreation
Paul Dzerk, UNLV Landscape & Grounds
Cayenne Engle, Nevada Division of Forestry
Steve G limp, City of Las Vegas Superintendent of Parks
Preston Goodman, City of Henderson
Jose Jimenez, UNLV Landscape & Grounds
Jennifer Margison, Landscape Architect
Laura Miller, Landscape Architect
Johanna Murphy, City of North Las Vegas
Paul Noe, Star Nursery
Lisa Ortega, Nevada Division of Forestry
Summer Ortiz, Las Vegas Valley Water District
M.L. Robinson, UNR Cooperative Extension
Seth Shanahan, Southern Nevada Water Authority
Sergio Solis-Sauri, Boulder City

Prohibited Plants

The following plants are no longer sold or allowed to be planted in Southern Nevada because they are on the State of Nevada's noxious weed list or are banned by the Clark County Health District for their allergenic properties. This list is subject to change.

Canopy coverage under the Water Smart Landscapes program for existing plantings:

- Green/Crimson Fountain Grass (*Pennisetum setaceum*) - 7 sq. ft.
- Fruitless Mulberry Tree (*Morus alba*) - 722 sq. ft.
- Fruiting Olive Tree (*Olea europaea*) - 530 sq. ft.
- Chaste Tree (*Vitex agnus-castus*) - 368 sq. ft.

Introduction

The Southern Nevada Regional Planning Coalition (SNRPC) and the Southern Nevada Water Authority (SNWA) are pleased to present this list of plants for the Southern Nevada region.

The original 2011 list was created by SNRPC's Regional Urban Forestry Working Group in conjunction with local experts including arborists, horticulturists, and urban foresters. Much of the effort was built on the foundations of excellent local resources such as the Nevada Division of Forestry's 2007 Cleaner Air, Tree by Tree and the 2005 Centennial edition of *Trees for Tomorrow*, a project of the High Desert Resource Conservation & Development Council. Both projects were made possible by grants from the Nevada Division of Forestry and the United States Forest Service.

The 2021 update was produced by a reconvened working group of local experts. The most notable revisions are to the Tree section, with an emphasis on deterring use of tree species poorly adapted to current and future conditions.

The intent of this list is to provide a single, region-wide reference for homeowners, landscape designers, architects and developers to select appropriate plants when designing their projects in the Las Vegas area. In addition, it is a tool for those who review those projects—such as city planners—to determine if those plants meet applicable codes and ordinances. Lastly, it contains information on plant canopy coverage, which is used by the SNWA in the Water Smart Landscapes incentive program.

Current and changing conditions in our region make proper plant selection more important than ever. The Las Vegas area is one of the fastest growing urban heat islands, and climate projections suggest it will become hotter and drier in the future. Choosing climate resilient plants that can survive and thrive in these conditions can help to moderate these effects to sustain and enhance quality of life in our community.

For the 2021 update, the Trees, Palms and Cycads sections now include a rating system from 1-5 stars, with 1 stars being inappropriate and 5 stars highly-appropriate for our region. A plant's rating is based on a number of important factors related to climate resilience such as environmental tolerances, water efficiency, drought tolerance, pathogen resistance and maintenance demands. Additional consideration was given to the potential for the plant to increase or decrease the diversity of our urban forest.

For example, *Prunus cerasifera 'Atropurea'* "Purple Leaf Plum" has a 1-star rating due to its heat sensitivity, poor drought tolerance, and susceptibility to pests. *Acacia aneura* "Mulga Acacia," on the other hand, has a 5-star rating because it is a well adapted desert plant with few pests, and it is not widely planted, so it has potential to diversify the urban forest.

This list is not intended to be a list of the only plants allowed in the region, nor is it intended to be an exhaustive, comprehensive list of all desert-appropriate plants. In addition, it is not intended to restrict what plants residents choose to plant in their yards. Rather, we hope that this list will help residents and developers make informed decisions about which plants to choose.

How to Use the List

The list is divided between trees and other plants, including shrubs, groundcovers, vines, succulents and perennials. It is sorted alphabetically by botanical name and includes the common names of the plants. **You may use "Ctrl+F" to search the document for any term.** Several columns of attributes can be used to determine which plants are appropriate to use in specific situations.

Tree ratings depend upon a variety of factors, which are generally noted in the "comments" column.

1. **Organic mulch** – doesn't perform well without an organic surface treatment, such as wood chips or leaf litter, rather than crushed rock.
2. **Many cultivars** – your nursery may have numerous named cultivars of the same plant species.
3. **Overplanted** - A plant heavily used in the region and at risk for a catastrophic loss of urban tree canopy under adverse conditions.
4. **Poor environmental tolerance** – Likely to be damaged by cold, heat or other environmental issues.
5. **Invasive Species** – a plant that reproduces aggressively into urban or natural ecosystems, some of which may be prohibited by law.
6. **Mojave native** – A plant that grows naturally in some parts of the Mojave Desert.
7. **Poor Drought Tolerance** – unable to persist through prolonged conditions of low soil moisture.
8. **Susceptible to Pests** – Commonly attacked by diseases or insects.
9. **Short lifespan** – not expected to achieve the expected lifespan under local conditions.
10. **Protected microclimate required** – Capable of thriving, but only if protected from the harshest summer conditions, such as east and north-facing exposures.

Process for Review and Amendment

The SNWA/SNRPC Plant List is intended to be a living document and will therefore be open to periodic review and amendment. Requests to add plants or modify information must be submitted to the SNWA Conservation Division by emailing conservation@snwa.com. Requests should include the following information at a minimum:

1. the applicant's name and contact information
2. the botanical and common name(s) of the plant(s) to be considered.
3. for the revision to be considered, and supporting documentation.
4. For new plants, documentation shall include the plants' proposed attributes and information regarding the plant's history and performance in similar climates.
5. Supporting documentation must be verified by a certified arborist or horticulturist.

KEY

Rating: Based on a combination of factors related to climate resiliency such as environmental tolerances (heat, cold), water efficiency, drought tolerance, pathogen resistance, along with some additional factors like diversity, maintenance needs, and invasiveness. Plants rated from 1★ (least appropriate) to 5★ (most appropriate)

Tree Size (based on both height and width): Small (< 20 ft), Medium (20-29 ft), Large (30- 45ft), EXtra Large (>45ft)

Tree Type: Deciduous, Evergreen, Semi-evergreen

Growth Rate: Slow - Moderate

Water Needs: Very Low, Low, Moderate, High

Water Needs: Very Low, Low, Moderate, High
Excessive Litter: Leaves, Flowers, Seeds/Fruit

Comments

1. Organic mulch recommended
 2. Many cultivars
 3. Overplanted
 4. Poor environmental tolerances
 5. Invasive species
 6. Mojave native
 7. Poor drought tolerance
 8. Susceptible to Pests
 9. Short lifespan
 10. Protected microclimate necessary

KEY												COMMENTS			
"Bulletproof" : Extremely drought tolerant, cold hardy, and pest and disease resistant once established.															
Height, Width, Coverage at mature growth.															
Type: Deciduous, Evergreen, Semi-evergreen															
Growth Rate: Slow, Medium, Fast															
Water Use: Very Low, Low, Medium, High															
Drought Tolerance: Low, Medium, High															
Exposure: Full sun, Partial shade, Shade															
Needs a protected site (north facing site or afternoon shade).
